

Meiosis Foldable

- Using a full size sheet of paper you will create a study tool for meiosis
- This will be able to be used on this week's quiz over meiosis
- Fold the paper "hot dog" style
- Cut four sections into one side of the "hot dog"
 - Each of the sections will be a phase (i.e prophase, metaphase)
- Open up the paper and label one side (I) and the other side (II)
- Using a drawing AND words, describe each stage in your foldable
- Put your name on the back of the foldable
- I have started a sample for you to refer to
