

On a piece of paper complete a reflection regarding your cancer assignment:

- 1) What was one of the most interesting things you learned while doing your research? Why is this the most interesting to you?
- 2) What as the most difficult part to complete? Why?
- 3) Have you had any experience with the type of cancer you researched prior to this assignment?
- 4) Using what you found in your research about what cancer is, why do you think this assignment was done during the unit on cell division?
- 5) How do you think this assignment could be changed in future years? Give at least two ideas.
